In the duration of the performance, the dance movements bring her back to the time of her childhood, as they evoke her memory through her body. The proceedings are the same as on the evening. Temsirolimus activates autophagy and enhances progerin clearance while decreasing proteasome activity in HGPS cells. Rosen also suggests that the musical language of the classical style was adapted by Mozart to convey the drama: many sections of the opera musically resemble sonata form; by movement through a sequence of keys, they build up and resolve musical tension, providing a natural musical reflection of the drama.
